WELCOME TO OUR NEW NATIVE PLANTS
SHORELINE

**THE IMPORTANCE OF
NEEDLE GRASS**
Needle grass is a native plant that is important for the health of our shoreline. It helps to stabilize the soil and prevent erosion. It also provides habitat for many birds and insects.

**WHY WE WANT
NEEDLE GRASS**
Needle grass is a native plant that is important for the health of our shoreline. It helps to stabilize the soil and prevent erosion. It also provides habitat for many birds and insects.

GULL LAKE QUALITY ORGANIZATION

NATIVE PLANTS SHORELINE

Look around the shore of the Creek and Lake to see beautiful native plants added by the Gull Lake Quality Organization. These plants will prevent the shoreline from washing away and help local pollinators thrive like bees, butterflies and hummingbirds. Thank you to GLQO Members and Prairieville Township Parks Commission for their support on this project.
